

ESI[tronic] 2.0 Online New Features

Activate the Online functions with only one click:

We regularly further develop ESI[tronic] 2.0 Online on the basis of the feedback from our users. Thank you for the many positive feedbacks regarding the last update!

With this update, the following improvements are available:

- ▶ CAS+ is now also fully working in the online mode. **ONLINE!**
- ▶ Global OBD II Diagnosis can now be used without the need of identifying a vehicle.
- ▶ Improvements of the search: The results when entering a search term with more than one word has improved tremendously. **ONLINE!**
- ▶ Improvements of the search: The word suggestions are more numerous and extensive. **ONLINE!**
 - All comments can now be opened with one click
 - New links to tyre pressure, lighting systems, fault codes and service reset
 - Required spare parts can now be skipped separately from printing

Coverage for (brand) new vehicles

The initiative to provide system coverage for brand new vehicles continues.

The following vehicle models have been developed for you, just a few weeks after market launch and are available in ESI[tronic] from now on:

- ▶ **Volvo V60 Cross Country II (RB Keys: VOL2495, VOL2496) market introduction: March 2019**
- ▶ **Honda CR-V Hybrid (RB Keys: HON2643, HON2644) market introduction: February 2019**
- ▶ **Citroen C5 Aircross (RB Keys: CIT1296) market introduction: February 2019**

The focus here is particularly on the systems and functions for the most important service and repair tasks for the new vehicle.

The corresponding vehicle coverage can be obtained from the usual main and intermediate updates.

The new, quick installation for ESI[tronic] 2.0 Online

Be up to date quicker

The reduced installation is now available from the Download Manager (DDM).

Activate the new function under „my contracts“ by selecting „quick installation & online use“.

The new installation type offers many advantages:

- ▶ Quick download – download package size can be reduced by up to 50 %.
- ▶ Little hard drive space – required hard drive space is significantly reduced.
- ▶ Short installation time – ESI[tronic] 2.0 Online takes up considerably less time.

Using the “quick installation & online use” option you can choose to only load and install the **ECU diagnostics (SD)** and **Spare Parts Catalogs (A, D, E, and K)** locally on your hard drive.

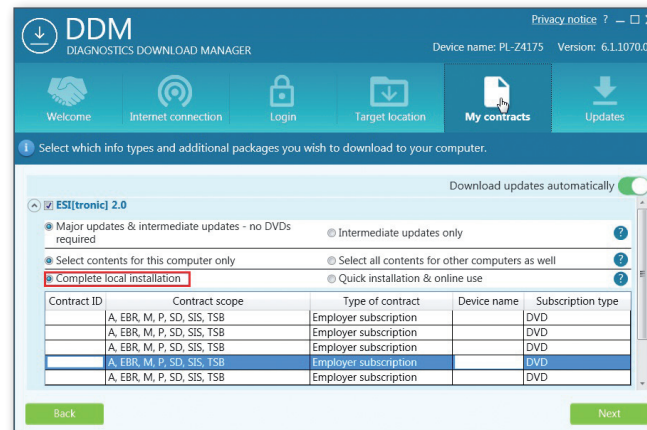

All additional information that is also available online, are no longer installed locally, but can be easily and directly accessed online.

Currently, the following information types can be accessed and used online:

- ▶ **Troubleshooting guides / manuals (SIS)**
- ▶ **Maintenance information (M)**
- ▶ **Schematics (P)**
- ▶ **Known Faults (TSB / EBR)**

Of course, you can still install all the information of the ESI[tronic] locally and use it without an internet connection.

To do this, select the „complete local installation“ option in the DDM.

Direct Hotline access in ESI[tronic]

The creation of a „technical request“ directly from ESI[tronic] is now possible for several countries from version 2019/2*

All benefits at a glance:

- ▶ **User-friendly and easy access** to technical hotline team for creating a technical request for passenger cars and trucks
- ▶ **All information in one system:**
The required information (including workshop, basic and log information from ESI[tronic]) is transferred to the technical team with one click
- ▶ After successful technical request submission, the Bosch technical team will get back to you with a solution as soon as possible (via phone or e-mail)
- ▶ For additional bookings of a subscription, please contact your distributor
- ▶ Now it is possible to **upload logs, images and test values directly**
- ▶ Only an **internet connection and a valid subscription** of the „vehicle repair hotline“ are required
- ▶ **No separate login required**, as your access information is stored in your ESI[tronic]

* in conjunction with a valid subscription to the vehicle repair hotline for passenger cars / trucks and infotypes SD / SIS
