

Bosch ESI[truck] Heavy Duty Truck Software Update

Version 2020/1

www.boschdiagnostics.com/pro

Welcome

In version 2020/1, Bosch continues to expand the ESI[truck] diagnostic coverage and capabilities. A brief summary of all the new features and coverage additions are on the following pages. Also see the graphs on the next pages that highlight the ever-growing capabilities that you – our valued customers – support when you make the decision to renew your annual software license.

If you are interested in even more of the details behind all the great improvements, please visit www.boschdiagnostics.com/pro, go to the downloads section, and click on the 'Full Release Notes' for this version.

New Features

Component Replacement Guide – Step by step instructions for removing, inspecting, and replacing components. Over 750 guides that cover: Cummins, Detroit Diesel, Navistar, Volvo/Mack, Paccar, Allison, Eaton, and more! Accessible from various context sensitive pop-up menus and selecting – Component Replacement Guides (internet required).

Exporting Data Tables to Excel Format – Enables the technician to save a set of data values on the screen to an Excel file to be viewed and analyzed at a later time.

Searching for a Diagnostic Action – Enables the technician to search all of the vehicle systems for a specific action. This relieves the technician of having to search which system to connect to in order to perform a specific diagnostic action. For example, search for 'DPF Regen' – which could be in the Engine, Aftertreatment, or Powertrain controller system.

Searching for a Diagnostic Function – Enables the technician to search for a diagnostic function once connected to the system. For example, if looking for a function that includes the word 'filter' – the technician can find all functions available with that keyword.

Many New Cables are Available! – With the recent addition of Off-Highway coverage, we continue to expand our cable offerings to enable simple connection. Contact your distributor for details.

Recent Product Upgrade

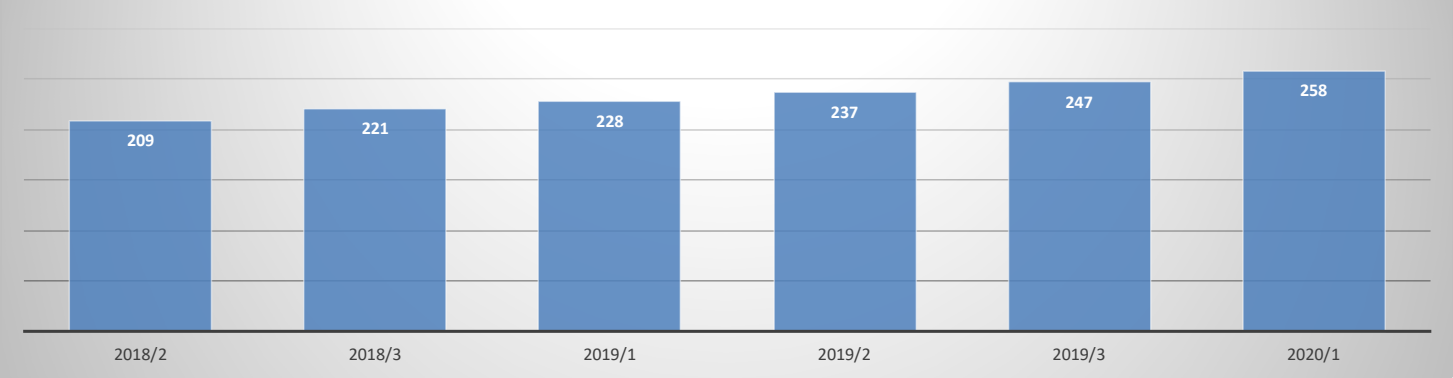

You now have the ability to upgrade your existing DCU 100 tablet (Windows 7) to the new, high-powered Windows 10 HDS 1000 tablet that comes with the 3824A ESI Truck.

The tablet upgrade is now available. See your preferred Bosch distributor for details.
